

Improving Outcomes Throughout Wisconsin

WISHIN Enables Better Coordination Of Care Through Partnership
With Bamboo Health

As providers and health systems become increasingly responsible for patient outcomes, the need for visibility into patient encounters outside their virtual four walls is more important than ever. Timely access to the right information can lead to better clinical decisions, more effective transitions of care, and reduced administrative costs. Better information leads to better outcomes.

Real-Time Notifications

With the power of Bamboo Health's national Smart Signals™ care coordination network, providers and payers in WISHIN's network can easily access timely and actionable patient insights. WISHIN's secure and comprehensive data powers Bamboo Health's solutions to improve care-coordination workflows, ultimately improving patient experiences and actionable interoperability in our health ecosystem.

Benefits

- Simplify transitions and admissions with access to real-time and accurate clinical data
- Achieve greater visibility into patient movement across the continuum of care
- Apply timely interventions to improve quality metrics (e.g. reduce preventable hospital readmissions)
- Strengthen partnerships to advance value-based care initiatives
